## (54) INTERNET SETTLING METHOD

## (57) Abstract:

**PROBLEM TO BE SOLVED:** To complete settlement of payment by using an ID card and performing transfer at the same time as when merchandise is purchased.

**SOLUTION:** When a merchandise catalog page is shown by an internet terminal 1 (step S102), the purchase of merchandise is applied (step S103) and a transfer source financial institution is selected (step S104), a financial institution window page is shown (step S105). Since an account ID and a password are requested (step S303) when an ID card is inserted into an ID card reader there (step S106) and financial institution identification information is sent (step S107), the account ID and the password are sent (step S108). When a transfer is applied (step S109) after verifying the account ID and the password (step S304), a transfer acceptance request is made (step S306). Therefore, when the transfer acceptance is reported (step S110), the transfer is carried out (step S307).
